Amina Aslam

.NET/.NET Core Developer

I am a passionate and results-driven .NET/.NET Core Developer with over 3 years of hands-on experience in designing, developing, and deploying secure, scalable, and high-performance enterprise-level web applications. My expertise lies in C#, ASP.NET Core MVC, Web API development, LINQ, Entity Framework, and the implementation of RESTful services to deliver seamless and efficient system integrations.
I take pride in writing clean, maintainable, and testable code that adheres to SOLID principles and best practices. My development approach is deeply rooted in a commitment to code quality, performance optimization, and long-term maintainability. I strongly believe that great software is built through collaboration, continuous learning, and attention to detail.
Whether working independently or as part of a cross-functional team, I bring a proactive attitude and problem-solving mindset to every project. I'm always eager to tackle real-world business challenges by delivering elegant and efficient software solutions.

PROFESSIONAL EXPERIENCE

NCEC Web Development **June 2025 - Present**
Synctecho Soft (Total IT Solutions)

- Designed and developed the complete frontend and backend system for NCEC School Network with 263 branches, ensuring performance, scalability, and maintainability.
- Implemented secure and efficient integration between frontend interfaces and backend services using ASP.NET Core, RESTful APIs, and Entity Framework Core.
- Established SQL Server connections for dynamic data access and implemented optimized queries to manage user accounts, attendance, and school operations efficiently.
- Managed and maintained user authentication, role-based access control, and real-time data handling to support thousands of active users across branches.

Clinic Management System – ERP (Desktop Application) **2024**
Synctecho Soft (Total IT Solutions)

- Led the development of a desktop-based ERP system tailored for clinic management, streamlining patient and inventory workflows.
- Developed modules for patient registration, medical records, and visit history, enabling efficient data capture and secure storage using SQL Server.
- Integrated Crystal Reports to generate professional reports for patient history, billing, and medicine issuance.
- Implemented robust database connectivity and operations for real-time data retrieval and updates.
- Designed and managed the medicine inventory module, including balance quantity tracking, stock updates, and expiration alerts.

EDUCATION

ICS
(Intermediate)

PFA College for Girls, Depalpur
2020 - 2021

Bachelor of Science in Computer Science (BSCS)

Virtual University of Pakistan, Lahore
2021 - 2025

CERTIFICATIONS

Certified in DOM (Diploma in Office Management)

Saif Academy, Depalpur
2020

Certified in Cyber Security

SKILLS

- C#
- VB.NET
- JavaScript / TypeScript
- HTML5 / CSS3
- Windows Forms / WPF
- .NET Framework
- .NET Core / .NET
- ASP.NET Web API
- Entity Framework / EF Core
- SQL Server

Inventory Management System – ERP (Desktop Application) **2023**

Synctecho Soft (Total IT Solutions)

- Designed and developed a robust ERP-based Inventory Management System to handle complex stock operations across multiple business workflows.
- Established secure and efficient SQL Server database integration to manage item definitions, opening balances, and real-time transaction tracking.
- Built modules for purchase entry, issue tracking, and dynamic balance quantity calculation, enabling precise inventory visibility and control.
- Developed and integrated key operational documents, including Invoices, Delivery Challans, IGP (Inward Gate Pass), and OGP (Outward Gate Pass) for seamless logistics and audit readiness.
- Automated inventory workflows and reporting using Crystal Reports, resulting in streamlined inventory audits and reduced manual effort.

Accounts Management System – ERP (Desktop Application) **2022**

Synctecho Soft (Total IT Solutions)

- Engineered and deployed a full-featured Accounts Management ERP module, streamlining end-to-end financial operations across the organization.
- Designed and implemented secure SQL Server integration to manage account heads, chart of accounts, party creation, and transactional data storage.
- Developed critical modules for voucher entry (payment, receipt, journal), enabling real-time and accurate financial posting and tracking.
- Enabled party management, ledger generation, and automated Trial Balance, Balance Sheet, and Income Statement reporting for efficient financial oversight.

HR Management System – ERP (Desktop Application) **2021**

Synctecho Soft (Total IT Solutions)

- Developed a comprehensive HR Management ERP System to automate core HR functions, including employee records, salary, and leave management.
- Created modules for employee registration, data management, and role assignments, ensuring structured personnel records and easy updates.
- Implemented features for leave tracking, allowing HR to efficiently manage employee leave requests, approvals, and balances.
- Designed a salary management module to handle salary processing, editing, deletion, and audit-friendly tracking of payroll changes.
- Enabled SQL Server-based data connectivity to ensure secure, real-time access to employee and payroll data.
- Delivered a user-friendly and scalable HR platform that improved administrative efficiency and reduced manual HR tasks.

Advanced Face Recognition System with Real-Time Detection – ERP **2025**

Virtual University Of Pakistan, Lahore (Final Year Project)

- Designed and developed a robust face recognition desktop application using C# (.NET Framework), SQL Server, OpenCV, and Emgu.CV, focused on real-time detection, recognition, and model training.

TOOLS

- Visual Studio / Visual Studio Code
- SQL Server Management Studio (SSMS)
- NuGet Package Manager
- VS Code

SOFT SKILLS

- Problem-solving
- Debugging and troubleshooting
- Team collaboration
- Communication skills
